*Bachelor of Software Engineering* 2010 – 2013
- **Azad University of Neka** Neka, Mazandaran, Iran  
*Bachelor of Software Engineering* 2017 – 2020
  - My main project was about watchman route problem that is about the smallest routing path a watchman should go to see all the space on the room – available on my github : <https://github.com/sajjadabd>

## EXPERIENCE

---

- **Online Shop** Neka, Mazandaran, Iran  
*Backend Developer* May 2018 - Present

Laravel and Livewire are great pair for designing the architecture of the website that fully qualified for ajax behaviour and REST APIs

- developing well-organized, maintainable, object-oriented, unit-tested code
- developing highly scalable and composable RESTful APIs
- **MVC Architecture:** use models and controllers to handle the logics of the whole system
- Maintenance of existing infrastructure

## Technologies

- **Artisan**: use php artisan utility command to migrate database tables
- **Sanctum**: Authentication and authorization standards such as Sanctum, OAuth
- **Tailwindcss**: create beautiful user interface
- **Composer**: using composer to install third party packages

## Achievements

- **In App Billing**: Implementing money payments for the application
- **Authentication**: send sms to verify that the registration request is for right person
- Clean Code written

## • CRM Project

Babolsar, Mazandaran, Iran
