SUMMARY

My name is Sajjad Abdollahi from Iran , a developer with an experience of building applications in agile environments, such as Scrum. My experience involves building scalable server side web apps using frameworks like Laravel .

- More Than 10 Years of Experience in Software & Web Developement

- Architected and developed back-end and front-end for Online Shops.

- Acted as lead developer managing a team to write enterprise grade PHP Laravel code.

- Designed architecture of more than 12 high end applications.

TECHNICAL SKILLS

- PHP , Laravel , Livewire

- Databases , MySQL , Sqlite , Tinker

- HTML , CSS , Tailwind

- Javscript , Alpine

- Git , Docker , Devops

SOFT SKILLS

- Teamwork , Creativity , Communication , Leadership , Adaptability , Attention to detail

EDUCATION

- **University Of Mazandaran**   Babolsar, Mazandaran, Iran
  Bachelor of Software Engineering   *2010 – 2013*
- **Azad University of Neka**   Neka, Mazandaran, Iran
  Bachelor of Software Engineering   *2017 – 2020*

  - the main project was about watchman route problem that is about the smallest routing path a watchman should go to see all the space on the room – available on my github : https://github.com/sajjadabd

EXPERIENCE

- **Online Shop**   Mazandaran, Iran
  Backend Developer   *May 2018 - Present*

  Laravel and Livewire are great pair for designing the architecture of the website that fully qualified for ajax behaviour and REST APIs

  - developing well-organized, maintainable, object-oriented, unit-tested code
  - developing highly scalable and composable RESTful APIs
  - **MVC Architecture**: use models and controllers to handle the logics of the whole system
  - Maintenance of existing infrastructure

Technologies
- **Artisan**: use php artisan utility command to migrate database tables
- **Sanctum**: Authentication and authorization standards such as Sanctum, OAuth
- **Tailwindcss**: create beautiful user interface
- **Composer**: using composer to install third party packages
- **Notifications**: Service for sending email, push and in-app notifications. Involved in features such as delivery time optimization, tracking, queuing and testing.
- **Eloquent**: make models to have more readable and maintainable code , boost performance of scaling the application

Achievements
- **In App Billing**: Implementing money payments for the application
- **Authentication**: send sms to verfiy that the registration request is for right person
- Clean Code written

- **CRM Project**   Mazandaran, Iran
  PHP Laravel Developer   *Jan 2018 - Oct 2021*

  a System for organizing your interactions with your loved ones. a CRM for your friends , family and customers

  - Add and manage contacts and Define relationships between them
  - Upload documents and photos and add notes for a contact

  Technologies
  - **Blade** for template engine
  - **Validating request** sanitize and trim data to secure the server-side and database transactions
  - Developed RESTful API for mobile applications and web applications using Laravel
  - use **job** and **queue** and schedule them to serve the light and fast server response
  - **Dev Environment**: Developement environment based on docker , standardized and require the PHP and Laravel dependencies. manage the core libraries that are shared by others.
  - **Laravel Testing**: write unit and functional test to make sure page response status code is correct and each component is visible in their belong pages .
  - **Database Seeding**: with factories and seeding database it is easier to layout your website with ready json data that server response to your front-end
  - **Livewire**: add items to cart without reloading the web page , sync every action you do on the frond side with back-end of the same component on the server , it makes buying from online shop more joyful to the customer

  Achievements
  - **GIT** as my version control system
  - **Laravel voyager** to make custom admin panel for management
  - Writing custom PHP packages

- **Chatbox**   Sari, Iran
  Javascript Developer   *Feb 2019 - Apr 2020*

  Chatbox is an online Messaging App Written in Node.Js with Express Framework works perfectly sending and recieving messages across the internet
